

Plastic Crates

The ventilated wall crates are perfect for storing agricultural produce in refrigeration rooms and excellent for ripening processes. Ventilated plastic crates is a long-term investment because of its strong and extremely durable nature also provides maximum ventilation. The plastic vented crates are light-weight and can be easily washed and cleaned when used therefore very convenient for work in the fields.

They can offer solutions that preserve the quality of agricultural produce, are resistant to extreme temperatures and can be easily cleaned and reused.

1. Crate AR20:

A very strong crate. Designed for a large number of work cycles with optimal ventilation vital for preserving agricultural produce. The ideal solution for the agriculture industry.

2. Crate AR23:

A very strong ventilated crate. Designed for a large number of work cycles with optimal ventilation vital for preserving agricultural produce. Ideal for the agriculture and food industries.

3. Crate AR14:

A very strong, ventilated crate, with a structure enabling cross stacking. Designed for a large number of work cycles with optimal ventilation vital for preserving agricultural produce. The ideal solution for the food industry.

4. **Crate AR10:**

Is a very strong ventilated plastic crate for agriculture produce with a structure enabling cross stacking. Designed for a large number of work cycles with optimal ventilation vital for preserving agricultural produce.

5. **Breeze Crate:**

Very light weight crate providing maximum ventilation; designed for one-way shipping and ideal for the agriculture industry.

6. Mushrooms Crate:

Very light weight crate providing maximum ventilation; designed for one-way shipping and ideal for the agriculture industry.

7. Crate AR13:

8. Crate AR16:

A very strong crate. Designed for a large number of work cycles with optimal ventilation vital for preserving agricultural produce. Recyclable and the ideal solution for the agriculture industry.

9. Crate AR41:

is a very strong, ventilated crate, designed for a large number of work cycles with optimal ventilation vital for preserving agricultural produce. Fully recyclable and an ideal solution for the agriculture industry.

10. Crate AR19:

A very strong, ventilated crate, with a structure enabling cross stacking. Designed for a large number of work cycles with optimal ventilation vital for preserving agricultural produce. The ideal solution for the agriculture industry.

11. Crate AR28:

an Ultra-light ventilated stackable plastic crate containers for herbs and greens designed for agriculture products.

12. Crate AR38:

is a very strong, ventilated crate, Designed for the agriculture industry.

13. Crate AR07:

Tray providing maximum ventilation to maintain product freshness; for the agriculture industry. Strong, durable and fully recyclable.

14. Strawberry Tray:
