

## *Egg Transport Equipment*

### ❖ **Mini Egg Box:**

These crates help egg producers to transport and stack eggs easily.

These crates are folded in each other when empty which decreases the volume of stack and the cost of transport. When full, the crates sit on each other perfectly. It is also possible to use it with fruits and vegetables.

Features:

- Hygienic - Easy to clean with water and steam.
- Provides extra ventilation thanks to compartments and holes.
- Eliminates labor and transportation costs.
- The eggs are kept clean and healthy.
- Does not harm the eggs during transportation.
- Provides easy stacking.

❖ **Maxi Egg Box:**

These crates help egg producers to transport and stack eggs easily. These crates are folded in each other when empty which decreases the volume of stack and the cost of transport. When full, the crates sit on each other perfectly. It is also possible to use it with fruits and vegetables.

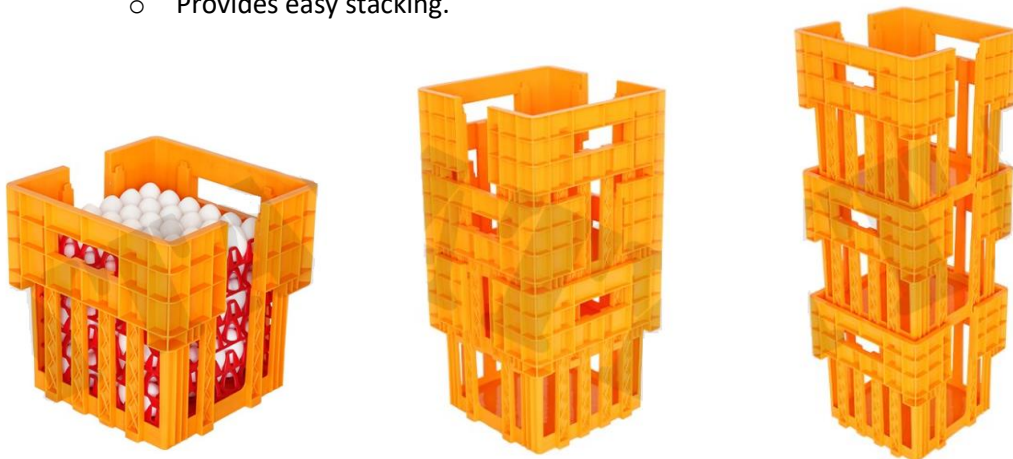

❖ **Small Egg Box:**

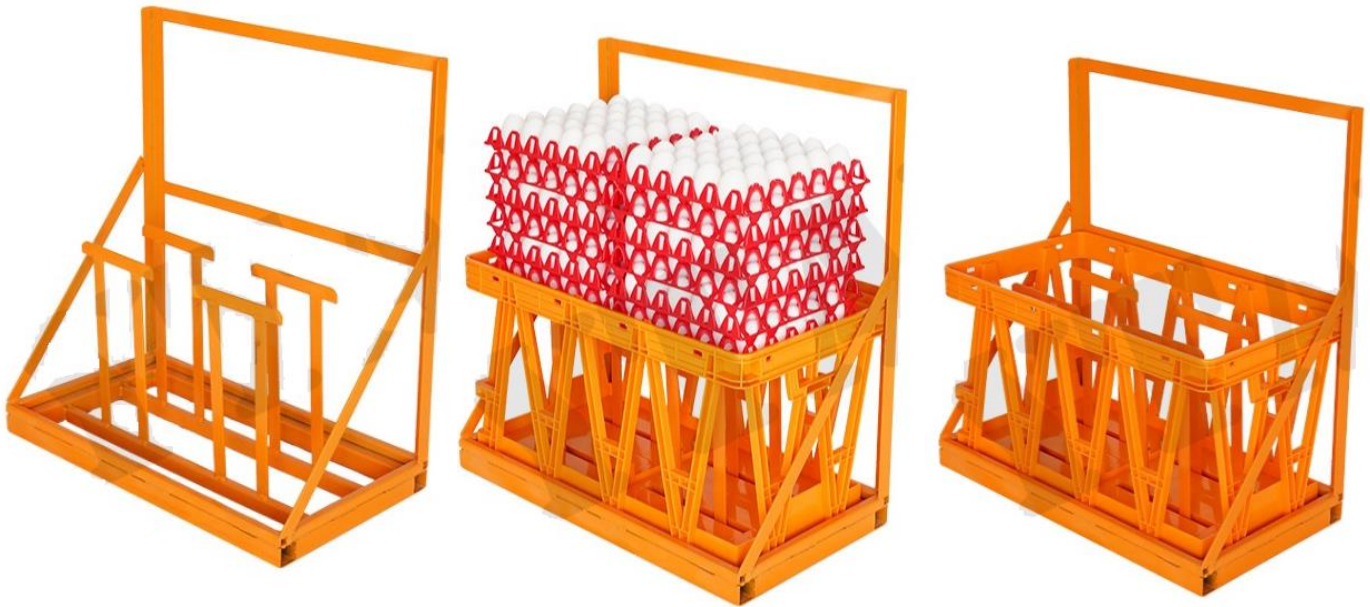

These crates help egg producers to transport and stack eggs easily. These crates are folded in each other when empty which decreases the volume of stack and the cost of transport. When full, the crates sit on each other perfectly. It is also possible to use it with fruits and vegetables.

Features:

- Hygienic - Easy to clean with water and steam.
- Provides extra ventilation thanks to compartments and holes.
- Eliminates labor and transportation costs.
- The eggs are kept clean and healthy.
- Does not harm the eggs during transportation.
- Provides easy stacking.

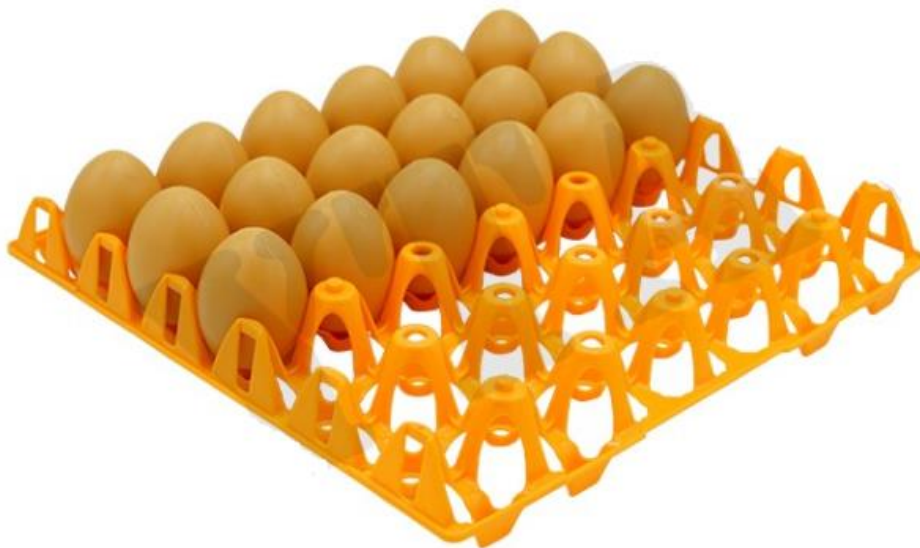

### ❖ Egg Crate Unloader

### ❖ Plastic Egg Tray:

Ideal for storing and cleaning eggs. These durable trays have a capacity of 30 chicken eggs, allowing manufacturers to transport and stack quickly.

❖ **Plastic Egg:**

Fake eggs used to balance and hold eggs.

❖ **Turkey and Duck Egg Tray:**

Ideal for storing and cleaning eggs. These durable trays have a capacity of 30 chicken eggs, allowing manufacturers to transport and stack quickly.

❖ **Egg Tray Divider:**

Egg transport separator helps integrators and manufacturers to quickly transport and stacking.

Features:

- Provides speed and convenience
- Prevents labour loss by saving time.
- Allows extra protection of eggs.

❖ **Vacuum Pump 0.25 Kw:**

The pump provides vacuum air to lift the eggs in egg trays and transport them to setter trays in hatchery.

❖ **Egg Lifter Fixed**

This egg lifter is used to transfer eggs from trays to trays by 30 pcs safely. Usually used in hatcheries. The plastic lifter suckers are design to transfer eggs without damage.

Features:

- Hygienic - Easy to clean with water and steam.
- Provides extra ventilation thanks to compartments and holes.
- Saves labor and time.
- Eggs are transported clean and healthy.
- Does not harm the eggs during transportation.
- It can carry 30 eggs at the same time.
- Egg handling is provided without touch.

❖ **Egg Lifter Sucker**

Generally used in hatcheries. The eggs are attached to the vacuum plastic and the eggs are transported with the help of air without touching them. This saves labor and time.

❖ **Egg Lifter Switch Able:**

This egg lifter is used to transfer eggs from trays to trays by 30 pcs safely. Usually used in hatcheries. The plastic lifter suckers are design to transfer eggs without damage.

Features:

- Hygienic - Easy to clean with water and steam.
- Provides extra ventilation thanks to compartments and holes.
- Saves labor and time.
- Eggs are transported clean and healthy.
- Does not harm the eggs during transportation.
- It can carry 30 eggs at the same time.
- Egg handling is provided without touch.

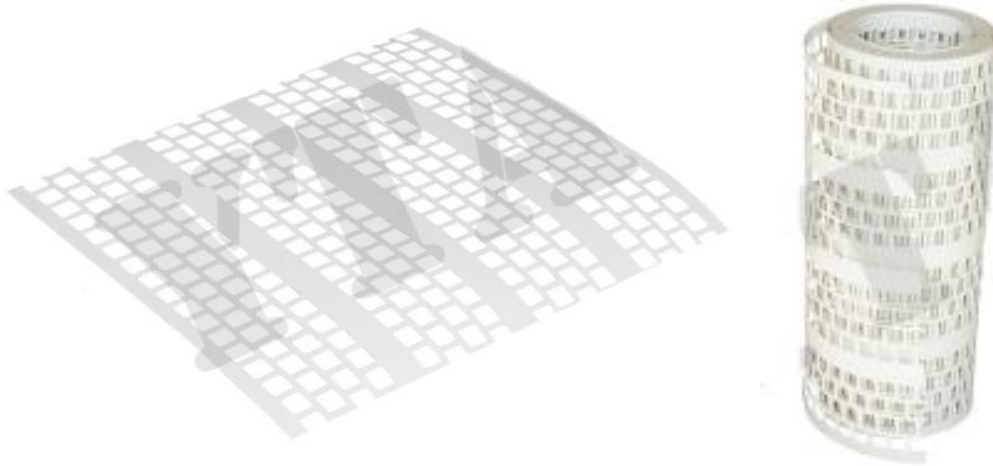

### ❖ **Automatic Nest Egg Transport Belt**

Used to collect eggs in automatic nests.

Features:

- The eggs are kept clean and healthy.
- Contamination and breakage of eggs is eliminated.
- Does not harm eggs during transportation.

### ❖ **Egg Belt**

Features:

- Reduces damage rate. It also provides egg cleaning.
- It does not form bacteria and fungi.
- Suitable for all climatic conditions. Can be cleaned directly in cold water.
- Provides high efficiency.
- Minimizes labor and costs.
- Broken egg rate is minimized.
- New design, durable and reliable.

Nylon material provides use for at least 10 years.
